

## Attention Assess Users!

### The new Assess Hiring Manager Report will be available beginning June 28, 2010

As organizations have increasingly pushed **Assess** earlier in the selection process to help them identify high potential candidates among their ever expanding applicant pool, we have received requests for a more condensed version of the Competency Selection Report. In response **Assess** now provides a Hiring Manager Report version which makes reviewing of the results more efficient.

**What information does a Hiring Manager Report provide?** The new condensed report provides the candidate's:

- Graphic profile
- Summary of strengths and weaknesses, and
- Interview questions/probes with competency fit graphs.

You may view a complete sample of the Hiring Manager report for our General Manager Competency Model from the login page of your **Assess** User Site.

### What is the cost?

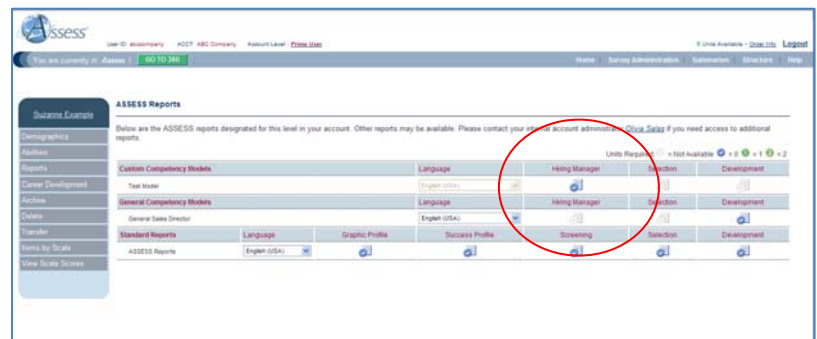

The two views of the selection results are available for the same cost. Once you process either a Selection or Hiring Manager report, the other report, for the same competency model, will be available at **no additional cost!**

### How do I start using the Hiring Manager Report?

- For those using any of the General Models, the Hiring Manager Report will be automatically activated in your account on Monday June 28<sup>th</sup>.

You will find the report on your **Assess** Reports screen.

- If you have a custom competency model, please contact your **Assess** distributor if you would like the Hiring Manager Report activated for specific models in your account.

**We hope you find the new Hiring Manager Report helpful to you!**
